EDUCATION

University of Central Florida

BA in Humanities

EXPERIENCE

Business Systems Analyst, Exelon

2024- June 2026 | Remote

- Identified and resolved operational gaps across four IT organizations by designing systems that improved visibility, accountability, and process consistency.
- Built a centralized contract lifecycle management platform consolidating 600+ historical contracts and 140 active agreements into a single source of truth for renewals, vendor management, and project alignment.
- Developed applications, dashboards, reporting tools, and workflow automations using Power BI, Power Apps, Power Automate, and SharePoint, replacing fragmented manual processes.
- Recognized for quickly mastering unfamiliar systems, troubleshooting complex operational challenges, and delivering practical solutions despite limited technical resources.
- Supported financial planning, executive reporting, and strategic decision-making through analysis, documentation, and custom-built business tools.

Analyst / Project Coordinator, Exelon

2022-2024 | Remote

- Managed forecasting, accruals, budget planning, procurement coordination, and asset tracking for multiple IT project teams.
- Improved contract renewal, invoice management, and document-control processes through SharePoint workflow enhancements and organizational restructuring.
- Built a reputation for rapidly learning new systems, solving undefined problems, and creating repeatable processes where none previously existed.

IT Analyst / Project Coordinator, Corevitas

2020-2022 | Remote

- Developed, tested, and troubleshooted survey instruments supporting pharmaceutical research data collection, validation, and reporting.
- Executed data migration initiatives and maintained project documentation for complex research programs.
- Strengthened technical and analytical expertise through hands-on ownership of system debugging, process improvement, and operational support.
